

Composition of the Sevilla LIEF and targets achieved

Partners

- Local authority's departments: Department of environment, Department for Innovation, Department of Urbanism.
- Energy management agencies (national, regional, local): Agencia Local de la Energía de Sevilla, Agencia Andaluza de la Energía.
- Housing Organisations: GAESCO.
- Associations of consumers / tenants: FACCUA, UCE, AI- Andalus.
- Citizen information centres: 15 civic centres throughout Seville.
- Environmental protection groups: Ecologistas en Acción.
- Architects: Colegio Oficial de Arquitectos. Colegio Oficial de Ingenieros.
- Transport companies: TUSSAM (public transports of Seville)
- Universities: Universidad de Sevilla. Universidad Pablo de Olavide.
- Energy service companies: Endesa, Gas natural, Repsol, Unión Fenosa, Iberdrola.
- Other partners: 30 education centres. Participation only in several campaigns.

Main actions foreseen

- Evaluate the strategy of the Local Energy Agency.
- Approve the local energy plan (two of them have been approved at the moment. The next one is being made by now and for the next six months).
- Evaluate the energy situation of the City.
- Participate in campaigns and activities organised by the Local Energy Agency.
- Promote energy saving and efficiency patterns and renewable energies throughout their sectors.

Targets in absolute figures

- The main target achieved has been the wide distribution of the energy problem and its awareness that overtakes the future of the City as it is now, the sustainability problem that it means and its main solutions in hand.
- Nevertheless, little advance has been proved in the total consumption patterns that still characterizes the urban system of Seville.
- That demonstrates that action must be improved in all sectors, including those directly related to the Local Government.
