

Questionnaire for Energy Plan

1. Specify the existing buildings of your municipality in which energy efficient technologies can be applied
2. Specify any new buildings planned or under construction in which integrated energy planning
3. Which of the following measures do you consider to apply in your municipality buildings? *(Rate from 1 to 5 according to the priority)*
 - Replacement of lamps
 - Improvement of the cooling/heating system
 - Replacement of the cooling/heating system
 - Replacement of fuel
 - Energy saving techniques on the building shell (insulation, double glazing, etc.)
 - Solar thermal systems for heating water/ spaces
 - Photovoltaic
4. Specify squares or outdoor spaces that can be improved by applying bioclimatic design (planting of trees, shading systems, materials, re-designing based on thermal and visual comfort)
5. Do you have a satisfactory public lighting system (using energy efficiency lighting, dimmers)? Do you plan to?
6. Are there public areas (squares, roads, outdoor spaces) in which photovoltaics can be applied for electricity purposes?
7. Are there sports centers in which RES, energy management systems and/or other energy technologies can be applied?
8. Are you interested in applying measures for reducing fuel consumption from fleet (public or private) and/or alternative fuel?
9. Have you ever applied energy efficient technologies or/and energy planning in buildings, installations or outdoors in your municipality?
10. Can you consider possible financing sources for such projects?
 - national funds
 - TPF, performance contracting
 - Regional funds
 - Other
11. Ideas and plans for cooperation with neighbouring municipalities
12. Other ideas for RES/RUE integration
13. Do you have activities (educational, artistic) in which participants can actively participate in regarding sustainability issues?
